DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 63, drawn to embedding of watermark into an image data, classified in class 382, subclass 100.
 - II. Claims 5-13, 31-39, 57 and 58, drawn to pattern recognition by calculating weighted similarities, classified in class 382, subclass 270.
 - III. Claims 14-21, 40-47, 59 and 60, drawn to image transformation based on correlation, classified in class 382, subclass 278.
 - IV. Claims 22-30, 48-56, 61 and 62, drawn to transformation of an image based on translation of the image, classified in class 382, subclass 295.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, II, III and IV has separate utility. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III or IV, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
